SKILLS

Languages: C, C++, Java, JavaScript
Tools/Platforms: Github, VS Code, MongoDB, MySQL, Docker, Linux
Soft Skills: Problem-Solving, Team Player, Adaptability

PROJECTS

Intelligent CPU Scheduler System | *CPP, Matplotlib* Apr' 25

- Developed an intelligent simulation tool to evaluate and compare 4 CPU scheduling algorithms, improving understanding of optimal process execution behaviour.
- Implemented FCFS, Round Robin, SJF, and Priority scheduling in C++, with performance visualization using Gantt charts and metric plots via Matplotlib.
- Analysed key metrics including average waiting time, turnaround time, and CPU utilization, enabling clear performance comparison across multiple test cases (10–20 processes).

Art Critique Bot | *GPT-4, LLM, Streamlit* Jan' 25

- Designed an AI-powered system to analyse and critique digital artworks, generating structured feedback across 3–5 artistic dimensions (composition, colour, style, creativity).
- Built the application using GPT-4 with Streamlit UI, and deployed via Docker to support multi-user access in a cloud environment.
- Enabled automated critique generation for multiple artwork styles, reducing manual review effort and improving feedback consistency by standardizing output format.

TRAINING

MyVirtualTeams (IT Services Company) Jun' 25 – Jul' 25

E-Commerce Web Application using MERN Stack

- Acquired comprehensive understanding of full-stack development by mastering the MERN stack and applying end-to-end concepts in a real-world e-commerce project.
- Strengthened API integration and authentication expertise by learning RESTful architecture, JWT-based security, and secure client-server communication.
- Enhanced problem-solving and debugging capabilities by analysing deployment errors, optimizing code structure, and implementing clean coding practices.

CERTIFICATES

- ChatGPT, Generative AI & LLM | [Infosys Springboard](#) Aug' 25
- GitHub Mastery | [GeeksForGeeks](#) Jun' 25
- Hardware and Operating Systems | [Coursera IBM](#) Aug' 24
- Entrepreneurship Learning Pathway | [LinkedIn Learning](#) Oct' 23

ACHIEVEMENTS

- Collaborated with a 4-member team at the Pantnix Hackathon to design and develop a Job Search System website, streamlining job listings, applications, and candidate discovery.
- Earned a 4-star Silver Badge in C++ on HackerRank, demonstrating solid proficiency in core language concepts and effective problem-solving skills.
- Secured a 2-Bronze Badge in Python on HackerRank, showcasing strong command over language fundamentals and problem-solving abilities.

EDUCATION

Lovely Professional University Punjab, India
Bachelor of Technology Aug' 23 – Present
Computer Science and Engineering; **CGPA : 8.45**

DM Public Senior Secondary School Bathinda, Punjab
Intermediate; **Percentage: 63.6** Apr' 22 – May' 23

KV SLIET Longowal Sangrur, Punjab
Matriculation; **Percentage: 94** Apr' 20 – May' 21
